

4th International Forum on Low Carbon Cities

第4回 低炭素都市国際フォーラム

8 October 2024 Kitakyushu, Japan

Introduction of the Forum

Ganbold Baasanjav

Head of UNESCAP East and North-East Asia Office

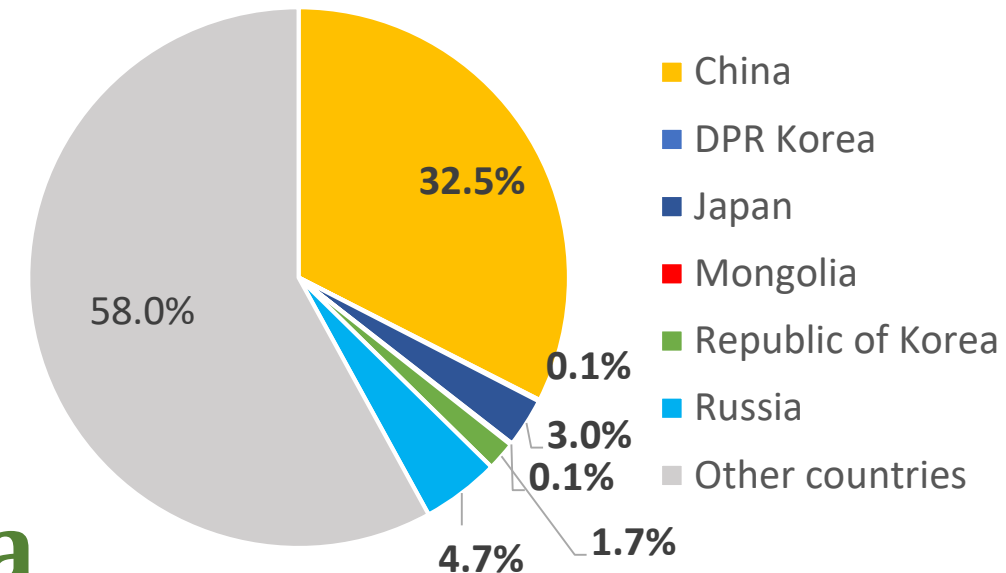

8 October 2024

The world is facing multidimensional global crises from changing climate

42% of CO² emissions from fuel consumption are from North-East Asia

Immediate actions are required to turn policy ambitions into actions, and the roles of cities are crucial.

Global CO₂ Emissions from Fossil Fuels
(Data: EDGAR, European Commission 2020)

North-East Asia Low Carbon City Platform

- The **North-East Asia Low Carbon City Platform** was launched in 2014 to
